

Our Sponsors Supporting Education

Our desire is to make a difference in those communities where we have a significant presence or business interest. Our emphasis is on education and youth, with over two-thirds of ExxonMobil's donations going to programs that enrich the lives of young people.

Our vision in education is to contribute to building a life-long learning system in Canada that ranks among the best in the world. Our focus is on programs that enhance math, science and technology education for Canadian school children. These skills are key to the development of the workforce of the future.

ExxonMobil

Supporting the Teacher

We highly value the important role that teachers play in elementary classrooms across the province and we recognize their valuable contributions to creating the next generation of knowledge workers. Teachers are professionals who direct the learning in the classroom and *Let's Do Science* has been created to support each teacher in that role. We are therefore delighted to help make *Let's Do Science* available to all elementary school teachers in Alberta.

Brad & Tanya Zumwalt

Supporting the Community

The Nickle Family Foundation's goal is to strengthen our community. We do this by funding non-profit organizations which excel at serving important community needs that enhance the quality of life throughout our city and province.
